

# Synchronization of Army Transformation

*What You  
Need to  
Know  
About the  
Network*

**LTG Steven W. Boutelle**  
*Chief Information Officer / G-6*

# Importance of the Network

***“Providing and **integrating** Command and Control (**C2**), **ISR**, and **communications** connectivity within the FCS UA and UE, with the rest of the Objective Force, and with Joint Forces, stands out as the **most critical challenge** to the **viability** of the **FCS** concept.”***

## ***Welch Panel (I) Report***

Review of the Army's  
Objective Force and Future  
Combat System Components

Independent Assessment  
Panel

Institute for Defense  
Analyses

# Governance

## ASD(NII) - DoD CIO

- IPv6 Compliant
- Data/XML

DoD AE

GES

## Networthiness Certification

- CTSF

Joint  
Interoperability  
Test Command

## Info Assurance

- OMB 300
- DoDI 8500

JTA JTA-A

Army CIO

AAE

Army Architecture  
Integration Cell  
(AAIC)

*Managing the  
Integration of the  
AKE into Joint  
Integrating  
Architecture*

# *Circuits*

- **End-to-End Management**
- **Manual Routing**
- **High Risk of Critical Path**

# Circuits Network

- End-to-End Management
- Manual Routing
- High Risk of Critical Path
- Network Management
- Built-in Redundancy
- Uses Joint Capabilities

# *The Global Environment*

- Multiple Current Force Networks including C4, ISR, Logistics & Personnel
- Teleport and Strategic Tactical Entrance Points (STEP)

# *How Does Your Product Connect?*

□ IOT&E is too late. . .

# Installation Information Infrastructure Modernization Program (I3MP)

Today

**We must fix the Last Mile to the Installation**

2003-2009

- Old Copper
- Analog, Aging Switches
- Limited Growth Ability

- Fiber or New Copper
- Latest Digital Switches
- Latest network equipment for high-speed data
- Upgrade Gateways to DISN/GIG-BE

Home Station  
Operation Center

## I3MP

- Installation upgrades of IT infrastructure
- High bandwidth access from installation to DISN

**Funding:  
\$3.2B  
(Army)**

### Locations:

All Army installations including ARNG and Army Reserve

Enablers for Future Combat System and Objective Force

# Global Information Grid (GIG) Bandwidth Expansion Program

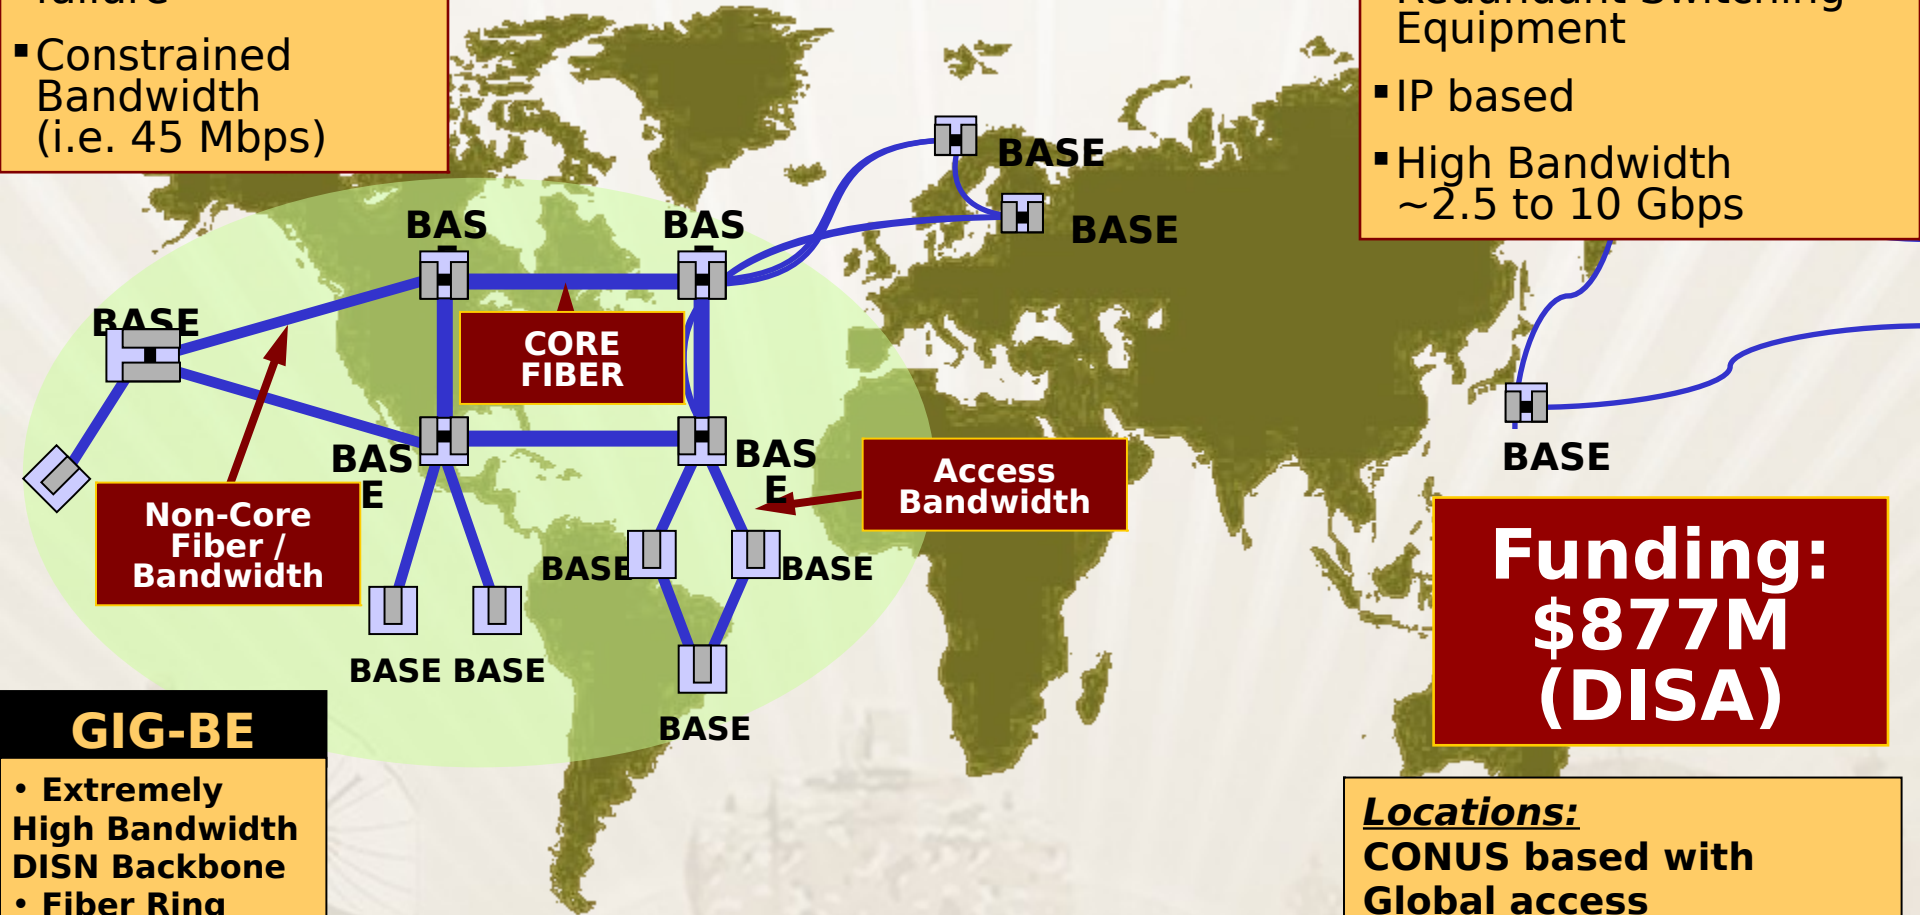

Today

**Ultra-High  
Bandwidth to Key  
Access Points**

2003-2004

- Multiple Carriers
- Single Points of failure
- Constrained Bandwidth (i.e. 45 Mbps)

- Physically Diverse Access
- Redundant Switching Equipment
- IP based
- High Bandwidth ~2.5 to 10 Gbps

**GIG-BE**

- Extremely High Bandwidth DISN Backbone
- Fiber Ring

**Funding:  
\$877M  
(DISA)**

**Locations:**  
CONUS based with  
Global access

Enablers for Future Combat System and Objective Force

# Teleport

Today

## Global Access To the Warfighter

2003-2007

### STEP

- Military
- Constrained Bandwidth (45 Mbps)

### Teleport

- Military and Commercial Access
- Increased Bandwidth (~102 Mbps)
- Crossbanding Mil to Comm (via teleport)

Landstuhl

Ramstein

Lago di Patria

Wahiawa

Camp Roberts

Norfolk

### Teleport

- Next Generation Tactical Entry Point for DISN Services
- Access to DISN Services including

NIPRnet, SIPRnet, DSN

FT Buckner

Funding : \$557M

### Locations:

Ft Meade	Ft Belvoir
Ft Bragg	
Croughton	
Bahrain	McDill
AFB	
Sigonella	Ft Detrick

Enablers for Future Combat System and Objectives

# Global Broadcast Service (GBS)

Today

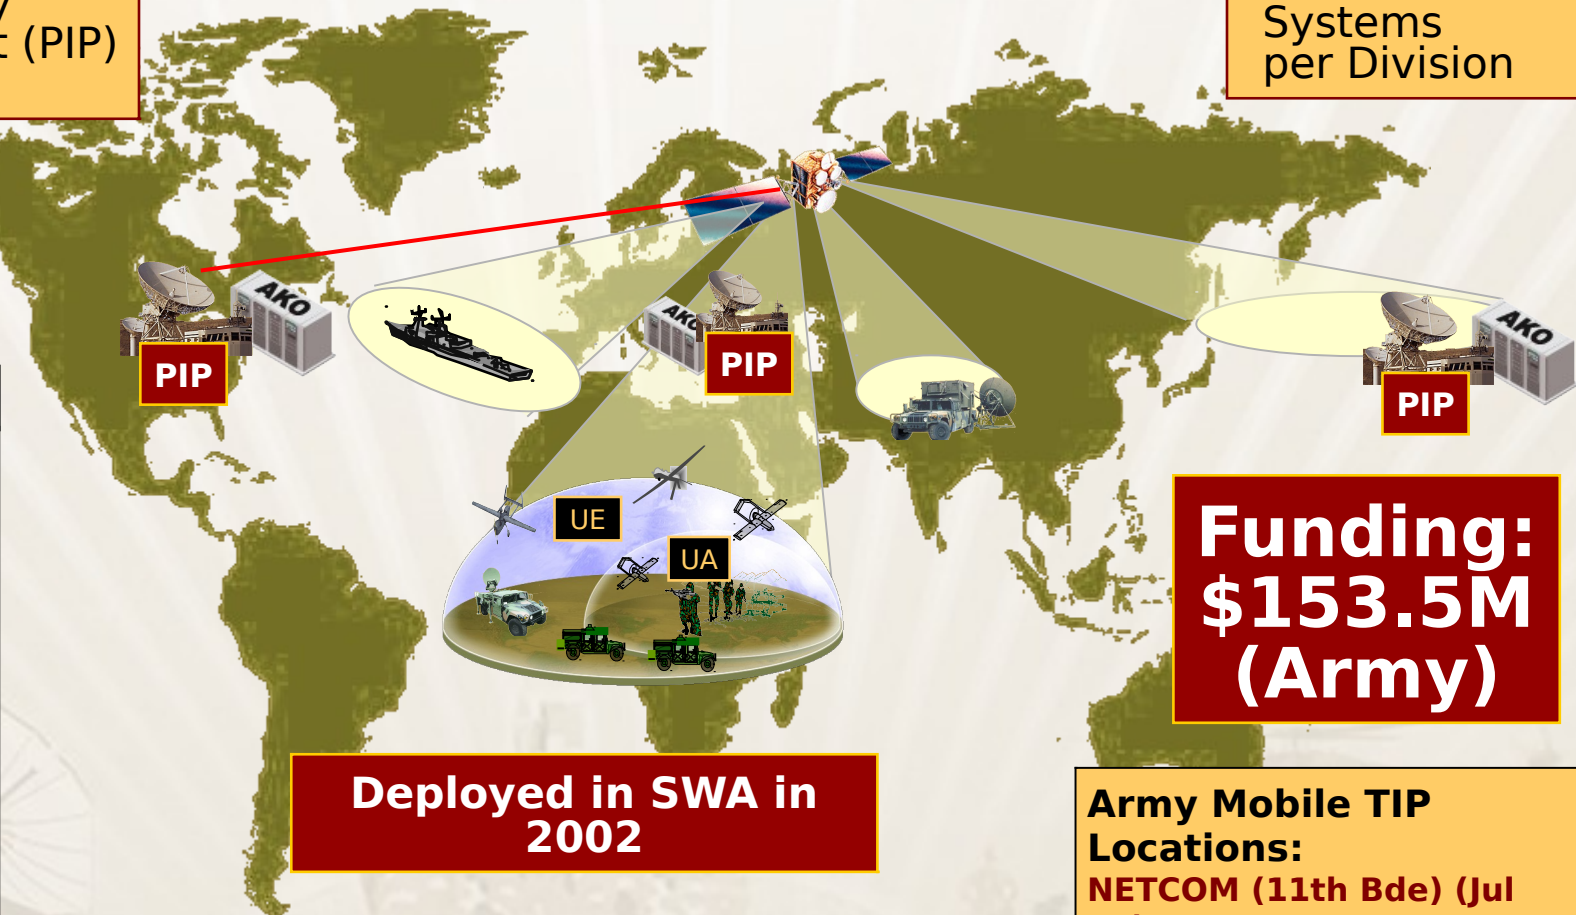

**Continuous *High-Speed Data* & Video to the Warfighter - GLOBALLY!**

2003-2011

- Worldwide Satellite Capability
- All (3) Primary Injection Point (PIP) Operational

- 456 Light Terminals
- 27x Rec Systems per Division

- GBS**
- Downloads Bulk Information to requiring units such as:
    - ✓ ATO
    - ✓ Ops/Intel Updates
    - ✓ CROP data
    - ✓ Imagery
    - ✓ Mapping
    - ✓ Video
    - ✓ News Services
    - ✓ Weather
    - ✓ Log data

**Funding: \$153.5M (Army)**

**Deployed in SWA in 2002**

**Army Mobile TIP Locations:**  
**NETCOM (11th Bde) (Jul 02)**

# Transformational Communications

Today

2003-20XX

- Constrained Bandwidth
- Stove-piped SATCOM

- “Big Pipes”
- Networked satellites
- On the Move Comms

“Bandwidth should not be a constraint.”  
– ASD(NII)

**Transformational Communications**

- Next Generation high bandwidth satellites with laser communications relays within new constellation

**Funding: \$231M**

**Locations: Global**

# **The National Science Center**

# *Created by An Act of Congress*

***The National Science Center*** was created by Public Law 99-145 in 1985 as amended by Section 280 of the 1996 Defense Authorization Act. As a result the National Science Center, a non-profit corporation, and the Secretary of the Army formed a partnership to develop a ***National Science Center*** to:

- **Promote *Science and Mathematics Education*** for all ages nationwide.
- **Motivate young Americans to seek careers in technology and engineering.**
- **Produce products and services providing hands-on training in the sciences.**
- **Operate and maintain a headquarters functioning as a hub for national education programs.**

**"One size does not fit all when it comes to educating our children."**

***U.S. Secretary of Education Rod Paige***

# Army-NSC Partnership

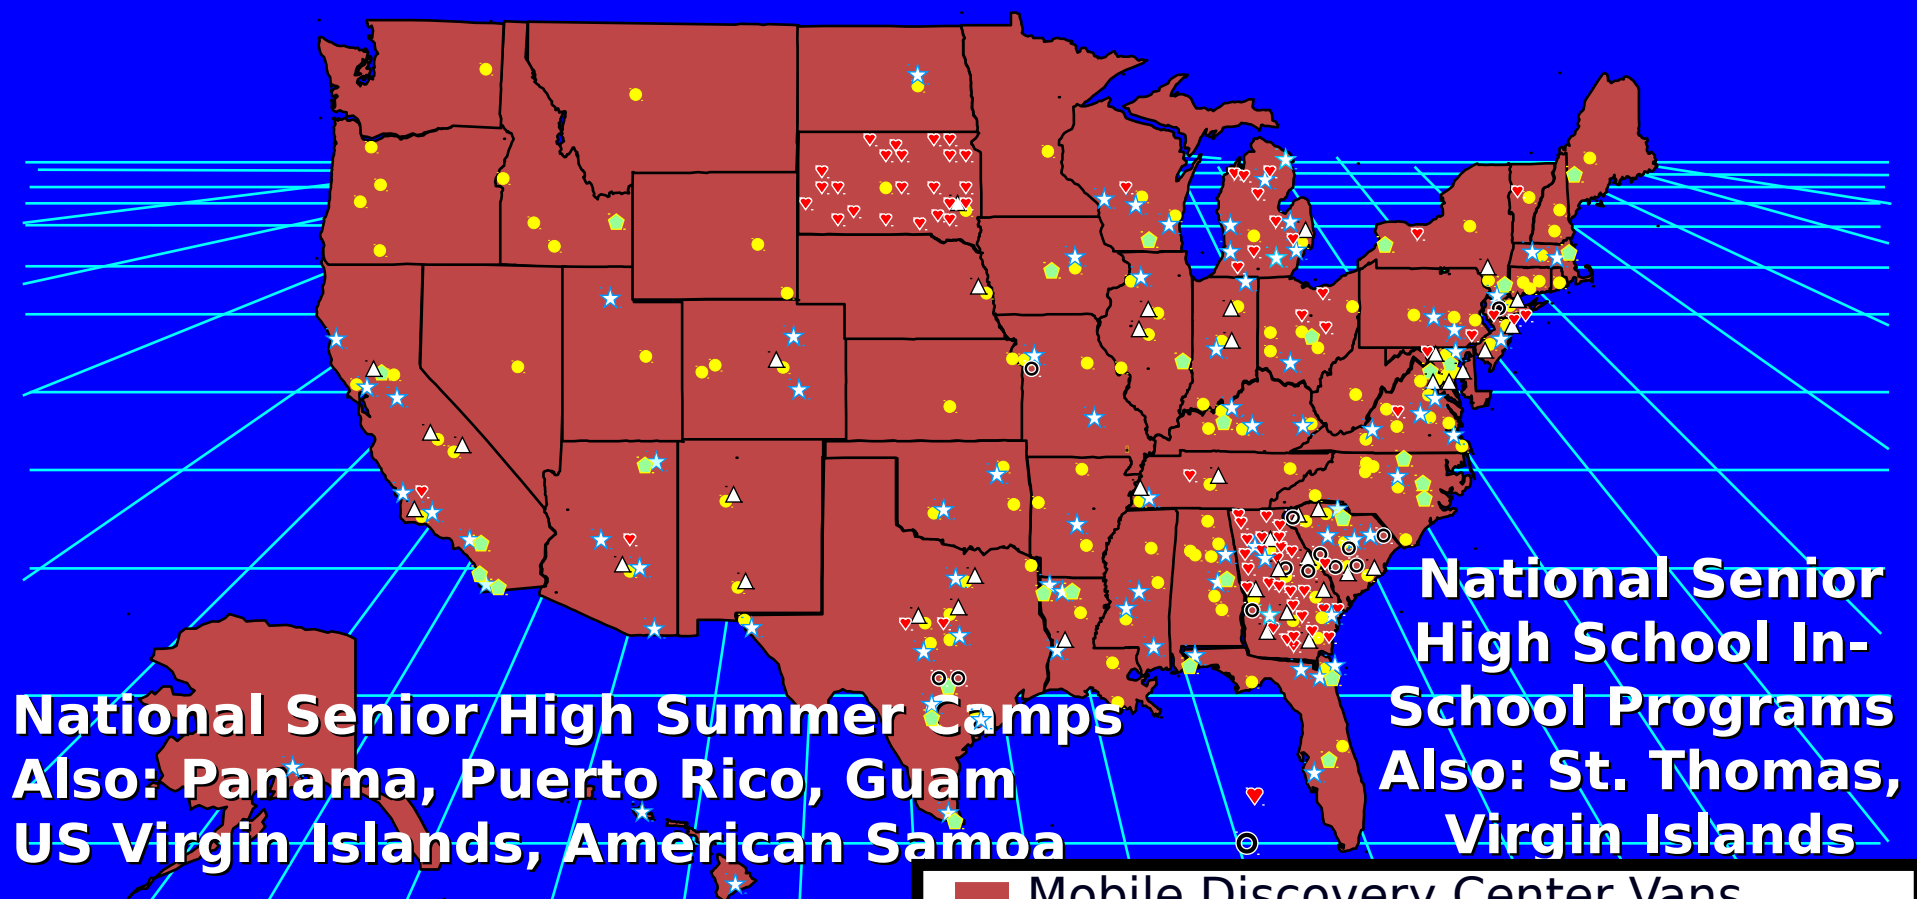

- Secretary of the Army entered into Memorandum of Understanding with the National Science Center for Communications and Electronics Foundation Incorporated ... A non profit corporation
- Secretary of the Army signed a New Education Partnership Agreement with NSC, Inc. on 22 May 2002
- Army commitment - \$2M covers salaries of DA civilians and some operating costs

# NATIONAL SCIENCE CENTER

## ***SUPPORT to the NATION***

### **LEGEND**

- Mobile Discovery Center Vans
- ★ JROTC High School Summer Camps
- ◆ JROTC High School In-School Program
- ▲ Math & Science Camps
- Starlab Programs
- ♥ Distance Learning Programs

# *NSC Support to the Nation*

*Support Needed*

**LTG Steven W. Boutelle**

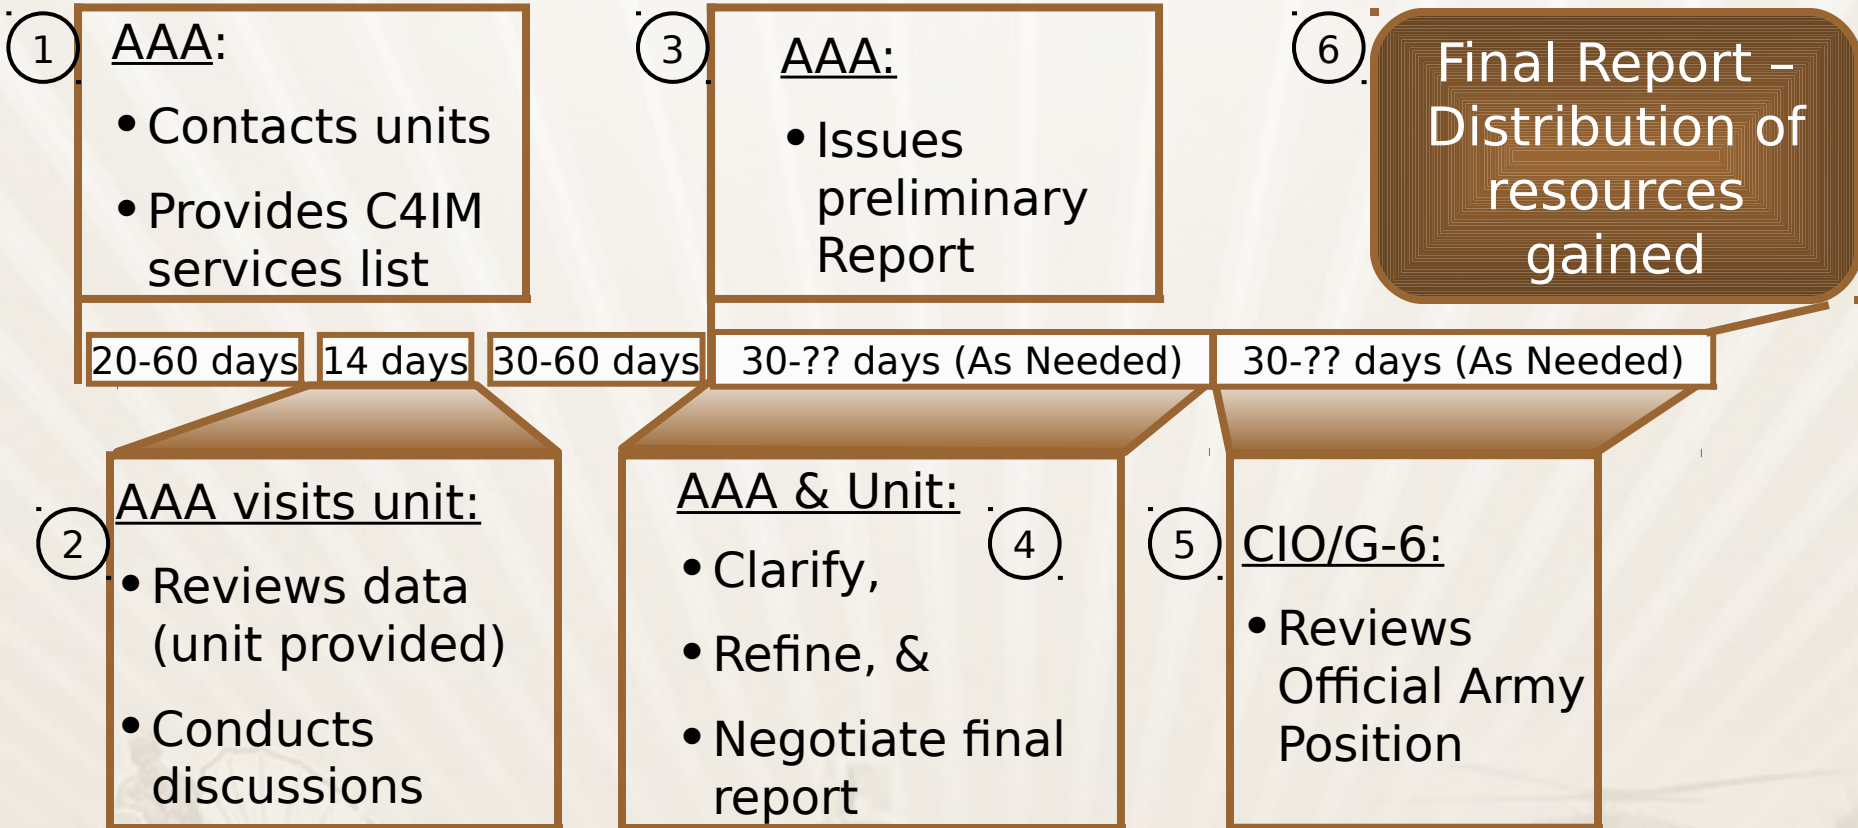

**Army Chief Information Officer / G-6**

# AAA Single DOIM Audit

Objective is more efficient use of Army assets

**Common Sense review** - it may talk like a duck & walk like a duck, but be a swan. **No cookie-cutter answers!**

# *NSC Major Programs*

- ❑ Mobile Discovery Center Vans – Two 18-wheelers take the science center experience to urban and rural schools nationwide
- ❑ Junior ROTC Math & Science Program – Provides 8 hours of hands-on math and science activities for summer camp and in-school programs
- ❑ Web Site Development – Delivers dynamic educational resources to a nationwide audience of middle school teachers and students
- ❑ Distance Learning – Offers interactive, inquiry-based demonstration programs designed to enhance classroom activities for grades K-12
- ❑ Fort Discovery – Science center with over 250 participatory, interactive exhibits of math, science, and technology on the Riverwalk in Augusta
